

OKORIE CHIGOZIE JEHOSHAPHAT

Full-Stack Developer

07081104368 | okoriechigozie99@gmail.com | [GitHub](#) | [LinkedIn](#) | [Portfolio](#)

PROFILE

Full-stack developer with hands-on experience building and deploying web applications across frontend, backend, and database layers. Computer Science student at the University of Nigeria, Nsukka, with experience from an engineering internship, independent projects, hackathons, and technical contributions within the Stellar ecosystem.

SKILLS

Frontend: React, Vue.js, JavaScript

Backend: Node.js, Express.js, Laravel

Databases: PostgreSQL, MySQL, MongoDB, Neon, SQL

EXPERIENCE

Solution Engineer Intern — InfoAssure | July 2025 – December 2025

- Worked on IT solutions during an industrial training placement, troubleshooting technical issues and helping develop practical fixes for business needs.
- Gained experience translating business requirements into technical solutions and working through implementation issues.

Open Source Contributor — Stellar Ecosystem

- Support developers and maintainers working on Stellar-based projects by debugging implementation issues and resolving technical blockers.
- Help troubleshoot wallet integrations, testing issues, and application code across projects including Drips and GrantFox.

PROJECTS

Launchpad — Opportunity Matching Platform | React, Express.js, Neon | September 2026

- Built an opportunity-matching platform that connects users with jobs, bootcamps, hackathons, open-source projects, and other opportunities based on their skills and stack.
- Developed both the frontend and backend, including the matching flow and opportunity requirement breakdown.
- Won the Genesys Wind Up hackathon with the Launchpad project.

Attendance System | Laravel, Vue.js, MySQL

- Built for a school internship to replace manual classroom attendance with trackable digital records.
- Developed both frontend and backend, including sign-in, clock-in, and clock-out functionality.
- Deployed the application and tested it with approximately 15 users; the main implementation challenge was frontend-backend integration.

MarketPulseAI

- Built a sales-recording tool for market sellers to record credit and debit transactions using voice input.
- Designed the workflow around simple natural-language entries, such as recording a sale of ₦5,000 for two gallons of oil.
- Tested the application with 12 users, using feedback to refine the user experience and functionality.

PROFESSIONAL DEVELOPMENT & CERTIFICATIONS

Gida Summer Bootcamp — Certified Frontend Developer | JavaScript, React

Genesys Upskill — Certified | October 2025 – December 2025

- Built practical forms, form validation, and small websites while developing frontend and JavaScript skills.

EDUCATION

B.Sc. Computer Science — University of Nigeria, Nsukka | Expected 2026

ACHIEVEMENT

Hackathon Winner — Genesys Wind Up | September 2026

- Won the hackathon with Launchpad, an opportunity-matching platform.
- Built the project independently across frontend and backend development.
- Implemented the core opportunity-matching workflow and requirement breakdown.
- Demonstrated the project as a working solution during the hackathon.
